Figure 1

Every call that is made to the Helpline Center is tracked and noted by type (fig. 2). A majority of calls received are information inquiries (last night’s lottery drawing, room reservations, etc.).

March 2018 saw an increase in intake calls, from 87 in February to 98 in March. *The calls received by the HelpLine Center labeled “Lottery” and “Casino” are from individuals seeking general information specific to those activities, not seeking help for a gambling problem as a result of participating in them.*

Figure 2

Intake Calls YTD 2018

Intake calls represent the calls made by individuals who are suffering from a problem gambling issue, have relapsed, or who know someone with a gambling problem. Callers are provided resources, such as Gamblers Anonymous (GA) meeting information and/or trained counselor contact information. For the month of March 2018, the total number of intake calls was 98 (fig. 3).

Figure 3

One of the primary pieces of information collected from our Helpline Specialists during intake calls is the most problematic form of gambling that a caller, or subject, is engaging in. Slots and other casino based games were the activity named during the majority of calls in March 2018 (fig. 4). This can likely be explained by the promotion and high visibility of the Helpline number throughout each of the 12 casinos that currently operate in Pennsylvania.

This month, Allegheny and Philadelphia counties accounted for nearly 31% of intake calls. In March 2018, the Helpline saw Luzerne, Montgomery and Northampton counties make up an additional 18% of intake calls.

Caller's Gender		Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	CALLS
Female		30	33	39										102
Male		67	53	59										179
Unwilling		0	1	0										1

On average in 2017, the percentage ratio of female to male callers/subjects was 43% to 57%. 2018 shows that approximately 36% of helpline calls are regarding female gamblers.

Ethnicity of Caller		Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	CALLS
African American		21	16	14										51
Asian American		3	2	2										7
Caucasian		69	63	76										208
Hispanic		2	2	1										5
Other		1	2	1										4
Unwilling		1	2	4										7

While studies have shown that Caucasian males gamble the most overall, it has been found that African-American males gamble most frequently and, unfortunately, develop problems at a very high rate. This disorder can impact people of all backgrounds, yet for some cultures, outreach for help is very limited.

Language Line		Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	Calls	CALLS
Callers passed along		3	0	0										3

The Helpline utilizes a Language Line service which quickly connects callers to assistance in over 60 available languages. There were no language line requests in March 2018.
